Frank Goodykoontz Memorial Hike To Be Held July 23, 2005

Please join us on Saturday, July 23 for a memorial hike in honor of Frank Goodykoontz, our “All time, Preeminent Leader,” who passed away on January 1 of this year. Several hikes will be led. Leaders JOE YOUNG, DAVID F EISENBERG, DIANE DUNBAR, DAVID MICHELS, FRANK DOBOS, WINNETTE BUTLER, and JOHN CONNELLY will be leading slow and moderately paced hikes. Meet at 8:00 AM at the La Cañada rideshare point to join the slower paced hike which will be suitable for beginners. Meet at 9:00 AM at La Cañada to join the faster paced group. Both groups will rendezvous on the summit of Mt Williamson (8244'). 8 miles round trip and 1500' of gain. Bring water, sturdy boots, hat, sunscreen, and stories about Frank and goodies to share.

In addition, MARS BONFIRE, KATHY CHEEVER, WOLF & KAREN LEVERICH will lead a hike which may visit the summit of peak 7558' which has been proposed to be named in honor of Frank. Exact route to be determined, but this very strenuous outing may involve 7 to 10 miles or so of hiking, 3,000' to 4,000' of gain, some on trail, some cross country. This group will rendezvous with the other groups on the summit of Mt Williamson. E-mail or SASE to Karen for more information.

Upcoming Meetings of the Management Committee

July 12 Tuesday At Winnette Butler's
August 9 Tuesday At Winnette Butler's
Please let us know if you plan to attend.

Pencil in these dates on your calendar:

Waterman Rendezvous: July 16, (+ a backpack)
(Several hikes to choose from) Saturday
See details on hikes on page 7

Annual Business Meeting: September 13, 7:00 PM
Eaton Canyon Nature Center Tuesday

The HPS Round Up September 24, 3:00 PM
Saturday
Hosted by Stag and Nami Brown
This special commemorative event celebrates the 50th anniversary of the first HPS Round Up in 1955
Chilao Picnic area on the Angeles Crest Highway

Angeles Crest Highway Said to be Closed “Indefinitely” Beyond Islip Saddle

According to sources at Caltrans and at the USFS, the Angeles Crest Highway will be closed “indefinitely” between Islip Saddle and a point a few miles west of Big Pines. Caltrans is said to be working to clear the highway of numerous rock falls, but there is no estimate of when the road will be reopened.

Numerous HPS outings may be affected by this closure. Please check the HPS website for up to date information about the status of road conditions.

Our newsletter, THE LOOKOUT, is published six times a year. Final dates for receipt of material are February 1 for the March-April issue; April 1 for the May-June issue; June 1 for the July-August issue; August 1 for the September-October issue; October 1 for the November-December issue; and please write your name on the whether digital or film. When sunglasses! If you want the SASE. Articles may be edited etc to Joe Young, 12551 (310) 301 - 9642; or email to the Hundred Peaks Section.

Take a look at the Hundred Peaks Section's website. Its address is http://angeles.sierraclub.org/hps/
This site contains information about the Section, upcoming events, the entire peak guide, historical information, achievements of our members, peak access concerns, and much more.
Check it out!
From the Chair  
By Wolf Lomenich

I remember showing up for my first HPS hike. I obviously weighed too much, I moved with the grace of a beached whale, my attire and gear were wildly inappropriate, and pretty much every atom in my body was screaming out "NEWBIE!!" to everyone gathered at the trailhead. And the leaders took me on the outing and tolerated my goofs, the participants were wonderfully friendly, and I was hooked.

Newbies are important to HPS. We need the fresh blood and their energy. They keep HPS vibrant and alive. All our heroes, from Weldon Heald to Frank Goodykoontz, will live on as long as there are new folks reading their trips reports and hearing the stories of things they did on our mountains.

But newbies don’t just happen, and they don’t affiliate with HPS by accident.

We can deliberately bring newbies into HPS. Some of the best sources are other Angeles Chapter organizations. Leading a hike to a HPS peak for another group/section/committee is a good way to get folks started. Just about every participant on a conditioning hike is a potential peakbagger. And just talking about HPS in other parts of the AC is always a good way to raise awareness and attract newbies. As you do the HPS mountains, you’ll undoubtedly run into other folks out on hikes. If you’re gregarious, say "HI" to these folks and introduce them to HPS if the opportunity arises.

Your friends, neighbors, co-workers, and family are all potential peakbaggers. If you know folks who might enjoy hiking, by all means invite them to participate in a HPS outing.

And there are many, many other things we can do to get new folks involved with HPS. Do what you can. Remember, introducing a new person to peakbagging is doing them a huge favor. Participating in HPS is good for the body and great for the soul.

So, a newbie shows up for a hike you’re leading or participating in. What should you do?

First of all, just be friendly. Just about every newbie is nervous on their first hike, and a little kindness goes a very, very long ways. And be tolerant. Newbies are slow, have the wrong gear, don’t understand how to efficiently use a rest break, and often behave in ways that can even seem downright rude to folks who have participated in many HPS outings. The newbies can’t help it—they don’t know any better. You can try to teach them, but it may be better just to be patient and figure they’ll learn from experience.

And have fun, and let them know you’re having fun. Some parts of peakbagging are just flat nasty: the cold, the heat, carrying the pack, slipping on lousy terrain, eating the bugs, being eaten by the bugs. Something you need to show the newbies is that you’re having fun in the midst of all the suffering. Show the newbie how to put the “1” under the little mountain next to their name in the register, point out other HPS peaks you can see, and just let newbie see that you’re having a good time.

Unfortunately, sometimes newbies just don’t fit on an outing. They’re too slow, too inexperienced, or just too something to fit in. Don’t suggest they go buy a boat. Do suggest they find a more appropriate outing, and let them know how to do that. Karen and I lead at a slow, consistent pace and many of our smaller hikes are appropriate for newbies, and many other leaders also have newbie-friendly outings. Suggest that the newbie look for outings with modest statistics, and that they contact the leaders in advance to verify that the pace will be right for them.

So let’s go get some newbies started in HPS. Maybe they’ll turn out like me. still overweight, still as graceful as a beached whale, but at least I’ve got the gear (mostly) right and I’m having an absolute blast doing the peaks!

Happy trails, Wolf.

Angeles Chapter Fundraiser
Tahiti 10-day Cruise from $1095
December 10-20, 2006

May 2005 Report of the Mountain Records Committee
By Wolf Leverich

15E LOOKOUT MOUNTAIN #2 HIKING ROUTE 2
(1) Change gain to from 2200' to 2800'. The additional gain comes from the fact we now park 300+’ lower and some saddles were not included in the old number.
(2) Change time to 6-7 hours, reflecting extensive deadfall now littering the route.
(3) Add 4260’ as the elevation of the lower trailhead.

23F BLACK MOUNTAIN #4 (Kudos to Dave Cannon and Lynda Armbruster) (1) For Route 1 the gain should be 1200’ total, 800’ out plus 400’ on return.
(2) Also for Route 1, the 3rd bullet under Hiking Route 1 should read "bump that is *southwest* of bump 5990".
(3) For Route 2 the gain should be 1400’ total, 960’ out plus 440’ on return.

28H PALM VIEW PEAK
(1) Change gain to from 1600' to 2000' to reflect saddles. (2) Change parking area elevation from 5340' to 5430' to correct dyslexic error.

28J PYRAMID PEAK
(1) Change gain to from 1700' to 2000' to reflect saddles. (2) Change parking area elevation from 5340' to 5430' to correct dyslexic error.

28K PINE MOUNTAIN #2
(1) Change gain to from 1550’ to 2300’ to reflect saddles. (2) Change parking area elevation from 5340’ to 5430’ to correct dyslexic error.

28L LION PEAK
(1) Change gain to from 1500’ to 2000’ to reflect saddles. (2) Change parking area elevation from 5340’ to 5430’ to correct dyslexic error.

32F STONEWALL PEAK (Kudos to Edith Liu)
(1) "The write-up says 2.5 miles round trip. It is definitely 4 miles. Maybe in the old days the endless amount of switchbacks didn't exist." (Wolf verified this – there are now a large number of low-gain [some under 20’ vertical] switchbacks in place.)

Karen's amendments:

Proposed change (with light tunes for Icehouse Canyon, Cow Canyon Saddle, etc.) to Baldy Village driving directions, impacts MANY peak guides:
- Take the Baseline exit from the 210 freeway
- Go briefly west on Baseline, then turn right (north) on Padua - Go 1.8 miles north on Padua to the intersection with Mount Baldy Rd. - Turn right and continue 7 miles to Baldy Village

Note: There's a good parking lot for ridesharing in this area. To get there, after turning west on Baseline, continue past Padua a short distance to Mill, then turn north on Mill and continue to Mount Baldy Road. The parking lot is at the NE corner of this intersection.

***

Just in from Torn Hill, for 29D Thomas Mountain: Current hiking directions read, "Hike southwest about 500’ to the summit. There is usually no register." Tom suggests (and I agree) that that should be northwest.

***

Updates to 15A Monrovia Peak. Wolf and I recent led Route 3, and to be honest, we're lucky we got the peak. Distance should be 20 miles (not 14).

Second and third bullet of hiking directions currently reads so: - Turn right, cross a bridge, and go up the paved road for 1/2 mile to Sawpit Dam. Continue on this road past the turnoff to Trask Boy Scout Camp. About 1/4 mile further is the
Ben Overturf Trail marked by two stone pillars and a map. You can take either the trail or the road for the next 2 miles (the trail is quite scenic). On the trail, after about 1 3/4 miles there is a junction signed "Cabin" and "Road." The right fork leads back to the road in about 1/4 mile. The right fork continues to climb for another 0.5 mile to another junction signed "Cabin" and "Road." The right fork leads to the road in about 100 yards. The left fork ends at Deer Park, the site of an old lodge. - Continue on the road to White Saddle (very obvious).

In addition to being longwinded and confusing, the above text also incorporates the VERY old route, munged in with the sort of old route. (In the early 1980s, the route stayed left, then crossed the dam. Now it stays right and doesn't cross the dam.)

How about this instead:
- Turn right on the road towards Trask Boy Scout Camp. Continue on this road past various landmarks (Sawpit Dam, Trask Boy Scout Camp, the start and end of the Ben Overturf Trail) for about 5 miles, to White Saddle (very obvious).

Further on, the guide suggests hiking 0.4 mile to some power lines and going up a ravine. But (per Route 4), it's actually 1.0 miles to the ravine, and there are no power lines. Suggestion: change the mileage and zap the power lines.

ANGELES CHAPTER FUNDRAISING TRIPS
by Roxana Lewis

AUG 15 Sun
O: 4th Graze Little Tokyo: Total immersion walking, eating tour of Little Tokyo. Start with a Docent tour of Japanese American Natl Museum, do some nibbling on Lotus root, cured bamboo, pressed shark, pounded rice as we wend our way to a Buddhist Temple and finish with an opportunity to see the Nisei Week Parade. An enriching experience for those souls who always wanted to know about unusual Asian food but were afraid to ask. Easy. 1.2mi. 9am-3pm. $30 ($50 non-mem) Inclds museum, ample grazing, donation. Send chk, sase, sc# to Ldr. Roxana Lewis, co-lrd Margaret Belknap
SEPT 19-29 Mon-Thur
C: Hiking the English Lakes & Edinburgh. Fly LAX to Manchester and spend a heavenly week walking the charming English Lakes of Grasmere, Ullswater, Windermere, all made famous by William Wordsworth. Stays will be in small local bed and breakfast inns. The Lakes walk will be followed by 3 days in historic Edinburgh, the cultural capital of Scotland. This is not a bus trip; ability to walk 8-10 miles daily. $2500 ($2550 non-mem) includes airfare, hotels (2share), breakfast, railfare, donation. To reserve send $500 deposit with 2SASE/SC#/H&W phones/email to Ldr. Roxana Lewis.
Co-lrd: Dotty Sandford

OCT 22-23 Sat-Sun
0: Train/Hike Weekend to Santa Barbara: Board the 9am train to Carpinteria. Hike 12.8 mi to Santa Barbara, moderate pace; tides allowing a portion on the sand. Overnight at Beachside inn (2share), hot tub to sooth the aches, then cruise hip State St. for local brew/vino. Morning opp to saunter the historic downtown area, shop or sit at an outdoor cafe. Return train from Santa Barbara station at 2pm, arr L.A. 5pm. $201 ($221 non-mem) rail fare, hotel, donation. Bring water, snacks, lunch (restaurant opportunity). Send check/sase/sc# to Ldr. Roxana Lewis, co-lrd Maggie Belknap

ADVANCE NOTICE
March 27-April 6, 2006 Mon-Thur
C: Hiking in Turkey & the Solar Eclipse. Fly LAX to Ankara, Hittite capital of Turkey, where after a brief overnight we proceed to an unpublished spot where the exactly 12:04pm; the sun will be blotted year younger. After the Earth in its infinite we proceed to Cappadocia where we will an area created centuries ago by the Turkish hiking adventure continues as we hotels along a coastal route that many Western Europe. Our trip finishes in trip; ability to walk 8-12 miles daily. $3884 hotels (2share), breakfast, local transport and guide, donation. To reserve send $700 deposit with 2SASE/SC#/H&W phones/email to Ldr. Roxana Lewis. Co-lrd: Joe Young
Advance Schedule of Hundred Peaks Section Activities  
April 30, 2005 through January 21, 2006  
By Karen Isaacson Leverich

Jul 1 Fri Hundred Peaks  
New Outing, not in Schedule  
I: Bighorn Peak (8441'), Ontario Peak (8693'), Sugarloaf Peak (6924'): Strenuous 12 mile, 4200' gain loop hike with steep and loose cross-country on the descent (or ascent, if we're feeling creative) via Fainting Rock Canyon in the Mt Baldy area. No beginners. Wilderness permit limits group size. Send sase or esase early to Karen. Co-Leaders: KAREN & WOLF LEVERICH, MARS BONFIRE

Jul 3 Sun Hundred Peaks  
I: San Bernardino East Peak (10,891'), San Bernardino Peak (10,649'), Anderson Peak (10,840'), Shield's Peak (10,680'): Very strenuous, 20 miles round trip, 5000' gain hike along the San Bernardino Ridge. Group size limited by permit. Send email (preferred) or SASE to Leader: LAURA JOSEPH Co-Leader: WAYNE VOLLAIRE

Jul 4 Mon Pasadena  
O: Moonlight Hike to Mount Lowe from Eaton Saddle: Join us for this popular event. Enjoy Rose Bowl fireworks from high above Los Angeles Basin on moderate 4 mile, 700' gain hike in Front Range. Meet 6:45 PM La Cañada ride Share point with water, snack, lugs soles, flashlight, binoculars helpful. Leaders: DON BRENNER, BYRON TAYLOR

Jul 6 Wed Local Hikes, Hundred Peaks  
O: Camp Glenwood to Winston Peak (7502'): Partly on the old Pacific Crest Trail. 7 miles round trip with 1100' of gain. Meet La Cañada ride Share point at 9 AM with water, lunch, good footwear. Leaders: BETH MIKA, DAN BUTLER

Jul 8 Fri Hundred Peaks  
I: Tehachapi Mountain (7960'), Black Mountain #3 (5666'): 8.5 miles round trip, 3750' gain through conifer forest on Tehachapi and oak, sage brush, and cattle pasture on Black. Near town of Tehachapi. Slow pace. Call Mars during four days before event for status and details. Leader: MARS BONFIRE Co-Leaders: KAREN & WOLF LEVERICH

Jul 9 Sat Hundred Peaks  
O: Constance Peak (6645'), Heart Bar Peak (8332'): Pick up two relatively easy peaks north of Redlands, adjacent to the San Gorgonio Wilderness, grand views, moderate pace. Do one or both, 7 miles round trip, 1600' gain. Can also join leaders next day for nearby Sugarloaf Mtn. Call or email leader weekly of hike for trip details. Leader: MARLEN MERTZ Co-Leader: TOM HILL

Jul 9 Sat Hundred Peaks  
O: Thunder Mountain (8587'), Telegraph Peak (8985'): Two wonderful peaks with springtime view in the Mt. Baldy area. This will be a bit of a strenuous outing. 13 miles round trip, 3300' gain from Manker Flat area. Meet 7 AM at Mt. Baldy ride Share. Bring 10 essentials, water, lunch, goodies, and more goodies. Leader: VIRGIL POPESCU Co-Leader: LILLY FUKUI

Jul 10 Sun Hundred Peaks  
O: Sugarloaf Mountain (9952'): Enjoy this isolated summit that towers above the south side of Big Bear Lake, moderate 8 miles round trip, 1800' gain. High clearance vehicles recommended due to 6 mile dirt road driving to reach trailhead. Call or email leader weekly of hike for trip details. Leader: MARLEN MERTZ Co-Leader: TOM HILL

Jul 12 Tue Hundred Peaks  
New Outing, not in Schedule  
I: Grinnell Mountain (10,284'): We will start at the Lost Creek Trailhead and take off cross country for this pathfinder route of 12 miles, 4500' gain. Expect an early start, so we can take advantage of the beautiful scenery and terrain. There are plenty of trees and a little brush. Moderate pace. Email Sandy the week before the hike for details. Leader: SANDY BURNSIDE Co-Leaders: MARS BONFIRE, GREG deHOOGH

Jul 12 Tue Hundred Peaks  
Management Meeting: Please join us for our monthly open management committee meeting. It will be held at the home of Winnette Butler, 1141 N. Columbus Ave, Glendale. 6:30 PM.

Jul 13 Wed Hundred Peaks  
New Outing, not in Schedule  
Mount Búrnham (8997'), Mount Baden Powell (9399'), Ross Mountain (7402'): Strenuous 9 miles round trip, 4500' gain (most on the return, in the warm afternoon), in San Gabriels on trail and use trail. Email/sase early to Karen. Co-Leaders: WOLF & KAREN LEVERICH, DAVE COMERZAN
Jul 13  Wed  Local Hikes, Hundred Peaks
O: Kratka Ridge (7515'): 6 miles round trip with 1200' of gain. Car shuttle. Fun ups and downs. Meet at 9 AM La Cañada rideshare with water, lunch, good footwear. Leaders: SOUTHERN COURTNEY, BOB THOMPSON

Jul 15-16  Fri-Sat  Hundred Peaks
O: Waterman Mountain (8038') Backpack and Rendezvous: Everyone else will arrive mid-day on Saturday, so here's the best way to get a good seat at the Waterman Rendezvous Potluck and Party: backpack in the night before and camp! It'll be a dry camp, so you'll need to carry all your water, but you won't need to carry it all that far -- the total hike will be 8 miles, 1200' gain. We'll start hiking in late afternoon or early evening. Option of nipping over and visiting Twin Peaks (7761') on Saturday morning, before the rendezvous would mean more water, more miles, more gain. SASE or e-SASE early for more details to Leaders: WOLF & KAREN LEVERICH Co-Leader: WINNETTE BUTLER

Jul 16  Sat  Hundred Peaks
The 12th Annual Great Waterman Mountain (8038') Rendezvous and Informal Pot Luck: HPS invites you to join us for our annual party atop Waterman Mountain. Plan on spending some time on top getting acquainted and having fun (and eating) as most hikes won't be returning to the cars until late afternoon or early evening. Be sure to bring lots of food and drink to share with other hungry hikers. Rain cancels.

Jul 16  Sat  Hundred Peaks
O: Waterman Mountain (8038'): Beginners welcome on this easy moderately paced hike. 8 miles 1200' gain. Picnic on top of the peak. Meet 9:30 AM La Cañada rideshare point. Leaders: FRANK DOBOS, LAURA QUINN, DIANE DUNBAR

Jul 16  Sat  Hundred Peaks
I: West Twin (7596'), Twin Peaks (7767'), Mt Waterman (8038'): Meet the HPS membership and friends atop Waterman by 1 PM for the celebrations, via pathfinder route from Twin Trail. Also, be one of the few to visit the beautiful stepsister, West Twin. Stats about 12 miles, 4200' gain on road, trail, use trail, and steep, lose mountainside, with a bit of scrambling. For experienced, conditioned hikers. Bring 4 liters liquid and treats to share. Meet 5:30 AM at La Cañada rideshare. Leader: GEORGE WYSUP Co-Leaders: GREG DE HOOGH, KENT SCHWITKIS, WAYNE VOLLARI

Jul 16  Sat  Hundred Peaks
O: Waterman Mountain (8308') By Mountain Bike: 7 miles round trip, 1300' gain on fire road. Meet 9 AM La Cañada rideshare point. Bring good quality mountain bike, riding helmet, spare tube, and cable lock, and don't forget some goodies to share with all those hiker dudes who will be looking at you funny as you arrive on two wheels. Leaders: KATHY CEEVER, MARS BONFIRE

Jul 17  Sun  Hundred Peaks
New Outing, Not in Schedule
I: Jean Peak (10,670'), Marion Mountain (10,320'): Let the Palm Springs Tram take you up to the trailhead for this moderately strenuous but picturesque route to Jean and Marion, 10 miles round trip, 2500' gain. Permit limits group size, so call or email leader in advance to reserve a spot. Leader: VIRGIL POPESCU Co-Leader: PAT ARREDONDO

Jul 17  Sun  Hundred Peaks
I: 10K Ridge (10,094'), Lake Peak (10,161'), Grinnell Mtn (10,284'): Reverse the normal order for doing these peaks and see how it goes on this strenuous trip to visit the dominant ridge east of San Gorgonio Mountain, 11 miles round trip, 3100' gain. We scramble up steep slopes, admire the "toothpick forest," and generally enjoy ourselves in the beautiful forest along this high wilderness ridge line. Number of participants limited by permit, so reserve early. Send sase/esase to Leader: MARLEN MERTZ Assistant: GEORGE WYSUP

Jul 17  Sun  Hundred Peaks
O: Pacifico Mountain (7124'), Granite Mountain #1 (6600+'), Round Top (6316'): Relax after the Waterman Rendezvous, and ratchet up your peak count, by visiting these drive-ups in the northern San Gabriels. Your high clearance vehicle welcome! Depending on road conditions, Pacifico is 0 miles, and 0' gain. Otherwise, 2-3 miles, a few hundred feet gain. Round Top we can park on. Granite is a pretty forested peak and a modest walk: ½ mile round trip, 300' gain. SASE or e-mail early with information about your vehicle (we hardly need to know your conditioning for this one!) to Karen. Co-Leaders: WOLF & KAREN LEVERICH, MARK ALLEN

Jul 18  Mon  Hundred Peaks
O: Middle Hawkins (8505'), South Mount Hawkins (7783'): 7 miles, 2400' gain over occasionally steep and loose terrain. This area burned a few years ago, watch for signs that it's making a comeback. Off Angeles Crest Highway in San Gabriel Mountains. Slow pace. Email/SASE early to Karen. Co-Leaders: WOLF & KAREN LEVERICH, DAVE COMERZAN

Jul 19  Tue  Hundred Peaks
Rescheduled from November 2004
O: Thunder Mountain (8587'), Telegraph Peak (8985'), Timber Mountain (8303'): Known as the three "T" in the Angeles National Forest near Mt. Baldy. We will do this as a car shuttle. 13 miles round trip with 3800' of gain. Contact leader 2-3 days before hike for details. Bring water, lunch, and lugsoles. Rain cancels. Leaders: DAVE COMERZAN, INGEBO RG PROCHAZKA
Jul 23 Sat Hundred Peaks
I/O: Frank Goodykoontz Memorial Hike to Goodykoontz Peak (7558'), Reserve this date for a memorial hike to celebrate the life and contributions of Frank. Routes will vary from moderate on trail to strenuous cross-country. See near the front page for details.
Leaders: JOE YOUNG, DAVID F EISENBERG, DIANE DUNBAR, DAVID MICHELS, FRANK DOBOS, WINNETTE BUTLER, JOHN CONNELLY, SANDY BURNSIDE

Jul 23 Sat Hundred Peaks
New Outing, Not in Schedule
I: Frank Goodykoontz Memorial Hike to Goodykoontz Peak (7558'), Mount Williamson (8244'): The main group will celebrate Frank on Williamson and not reach Goodykoontz Peak itself. Do you Want to visit the peak first then join the main group? We haven't settled on a route yet, but figure 7 to 10 miles or so of hiking, 3000' - 4000' gain, some on trail, some cross-country. E-mail or SASE to Karen for more information. Leaders: MARS BONFIRE, KATHY CEEVER, WOLF & KAREN LEVERICH

Jul 23-24 Sat-Sun Hundred Peaks, OCSS
I: Jean Peak (10,670'), Drury Peak (10,162'), Marion Mountain (10,362'), Folly Peak (10,490')
Rescheduled to September 24-25.
Leader: BILL GASKILL Co-Leader: GEORGE WYSUP

Jul 23 Sat Hundred Peaks
New Outing, Not in Schedule

Jul 24 Sun Hundred Peaks
O: Winston Peak (7502'), Winston Ridge (7003'): 6 miles round trip, 1200' gain from Cloudburst Summit. Slow to moderately paced. NO TIGERS. Meet 8:30 AM La Cañada ride share point with water, lunch, good footwear. Co-Leaders: WOLF & KAREN LEVERICH, MARK ALLEN

Jul 26 Tue Hundred Peaks
I: Cornell Peak (9750'): 5 miles, 1600' gain involving some rock scrambling suitable only for hikers with good rock scrambling skills. In San Jacinto State Park above Palm Springs. Slow pace. Call Mars during four days before event for status and details. Leader: MARS BONFIRE Co-Leader: SANDY BURNSIDE

Jul 27 Wed Local Hikes, Hundred Peaks
O: Winston Ridge (7003'): Leisurely hike from Cloudburst Summit down to Cooper Canyon Campground. Then back up the Pacific Crest Trail and on out to the top of Winston Ridge. 6 miles round trip with 1600' gain. Meet at 9 AM La Cañada ride share point with lunch, water, good footwear. Leaders: BETH MIKA, SOUTHERN COURTNEY

Jul 30 Sat Hundred Peaks, WTC
O: Baldylocks and the Three T's: You know the story: Baldylocks heads out from her Mt. Baldy Village home at the strike of dawn and hikes up 6000' in 6 miles to the top of Mt. Baldy (10,064') where, gazing eastward, she spies Mama T, Papa T and Baby T, aka the Three T's. "A T party!" she exclaims and scampers over Devil's Backbone, past the ski lift and up Thunder Mt. (8587'), Telegraph Peak (8865') and Timber Mt. (8303') before descending Icehouse Canyon to a waiting car shuttle. "Only 18 miles and 8600' gain -- this hike was ju-u-u-u-u-st right!" This will be a very long and very strenuous hike, paced to complete pre-dark. But if you think this hike is just right too, email your conditioning, experience and contact info to Leader: EDD RUSKOWITZ Assistant: MELISSA KANE

Jul 30-31 Sun-Sat Hundred Peaks
O: Three Sams in 24 Hours: Peter decided he wanted to hike San Antonio (10,064'), San Jacinto (10,804') and San Gorgonio (11,499') in one 24-hour period. Greg, fool that he is, decided that sounded like fun, though he did convince Peter we don't have to include the time up to the first one or down from the last one in the 24 hours. We're planning to get San Antonio via the ski lift and San Jacinto via the tram on Saturday. Sunday morning we'll be out there early to get San Gorgonio. Fellow fools fleet of foot feel free to join us. About 33 miles and 10,000' gain for the weekend. Space limited by permit. Send email (preferred) or SASE, with conditioning and experience, to Leader: GREG DE HOOGH Co-Leaders: PETER & IGNACIA DOGGETT

Jul 31 Sun Hundred Peaks
I: Copter Ridge (7499'), Middle Hawkins (8505'), Mt Hawkins (8850') loop: Join us as we climb Copter Ridge on this unusual loop route, never before scheduled, that approaches the summit through the canyon to the west. Enjoy a hidden idyllic stream on this moderately paced but strenuous 10 miles round trip, 4100' gain journey through pristine wilderness. We will return to the trailhead using the standard route up the ridge to Hawkins. Significant gain on the return! Experienced hikers send sase or eaise with contact information and recent conditioning to Leader: MARLEN MERTZ Assistant: TOM HILL

Aug 3 Wed Local Hikes, Hundred Peaks
O: Throop Peak (9138'), Mount Burnham (8997') from Dawson Saddle: 6 miles round trip, 1400' gain. Meet 9 AM La Cañada ride share point with water, lunch, good footwear. Leaders: DON SIMINSKI, JENNIFER WASHINGTON

Page 8
Aug 4 Thu Hundred Peaks
New Outing, not in Schedule
M: Southwell Peak (7840'), Antsell Rock (7879'): Slow paced, strenuous hike on trail and over steep, rocky cross-country terrain, 16 miles rt, 3500' gain. The summit block on Antsell involves 3rd class rock. Email or SASE early to Karen. Leaders: WOLF & KAREN LEVERICH

Aug 5 Fri Hundred Peaks
I: Three Sisters (6100'): A pretty forested peak in San Bernardino National Forest, 7 miles round trip on road and cross-country, 1800' gain. Mellow pace. Email or SASE early to Karen. Co-Leaders: KAREN & WOLF LEVERICH, MARS BONFIRE

Oct 29 Sat  Hundred Peaks  
O: Reyes Peak (7510’), Haddock Mtn (7146’): Enjoy autumn on the high ridge trails north of Ojai in Ventura County with spectacular views of the Los Padres wildlands. Moderate 9 miles round trip, 1700’ gain. Call or email leader week of hike for trip details. Leader: MARLEN MERTZ Co-Leader: TOM HILL  

Oct 29 Sat  Hundred Peaks  
I: Granite Mountain #2 (5633’): We did Whale then Granite last spring, so this fall, just for variety, we’ll do Granite then Whale. We’ll follow the route in Schad’s “Afoot & Afield in San Diego County”: 7 cross-country miles, 3200’ gain. Expect brush and boulders, steep ridges, sandy washes, dry waterfalls, nasty stickery plants, fantastic views. E-mail or SASE early to Karen. Co-leaders: KAREN & WOLF LEVERICH, PETER & IGNACIA DOGGETT  

Oct 30 Sun  Hundred Peaks  
O: Calliente Mountain (5106’): Long but fascinating, moderately paced hike on a gated road to view new National Monument from the high ridgelines, 17 miles round trip, 3000’ gain. Visit wildlife guzzlers, summit cabin, and high point of San Luis Obispo County. Much dirt road driving. For trip details and reservation send sase or ease to Leader: MARLEN MERTZ Co-Leader: TOM HILL  

Oct 30 Sun  Hundred Peaks  
I: Whale Peak (5349’): A popular and pretty peak in the Anza Borrego, Whale by Route 2 is 5 miles round trip, 1400’ gain. This route involves some quite gnarly dirt road driving (if we limp out along the way, expect to walk an additional few miles and climb some extra feet — more details will be provided closer to the trip date). Expect boulders, plants with thorns, and awe-inspiring desert scenery. E-mail or SASE early with information about your 4WD or high clearance vehicle (if you have one) to Leaders: KAREN & WOLF LEVERICH, PETER & IGNACIA DOGGETT  

Nov 5 Sat  Hundred Peaks, Palos Verdes South Bay  
I: Little Bear (7621’), Mill Peak (6870’) and Deep Creek Hot Springs (5’ deep): 14th semi-annual Fall Deep Creek Hot Springs hike/soak/swim with a couple more peaks. Moderately paced 9 miles, 2000’ gain. Bring lunch, water, rain gear, lug swim suit optional. Small amount of dirt road driving, but high clearance not required. Plan on spending full day - it’s near Hesperia via Big Bear. Rain cancels. Send email (preferable - bhochin@cox.net) or ease with carpool info to Leader: BARRY HOLCHIN Co-Leader: WAYNE VOLLARE  

Nov 5 Sat LTC Free Chapter-sponsored First Aid class in Los Angeles: Advance registration required, limited capacity so sign up early. In Southern Sierra near Highways 178 and 14. Slow pace. Call Mars during four days before event for status and details. Leader: MARS BONFIRE Co-Leader: KATHY CHEEVER

Dec 9 Fri Hundred Peaks
I: Bernard Peak (5360'), Little Berdoo Peak (5440'): 8 miles round trip, 1440' gain along open high desert ridges in Joshua Tree National Park. High clearance 4WD advised. Park entrance fee required. Slow pace. Call Mars during four days before event for status and details. Leader: MARS BONFIRE Co-Leaders: KAREN & WOLF LEVERICH

Dec 14 Wed Hundred Peaks, Local Hikes
O: Barley Flats (5600'): Join leader on his 50th birthday. Hike in Angeles National Forest involves 6 miles round trip, 1000' of gain, some brush on abandoned road from Red Box. Rain cancels. Bring water, sturdy boots, something to share on extended lunch on summit. Meet 8:00 AM at La Cañada rideshare. Leader: JOE YOUNG Assistant Leader: BOBCAT THOMPSON

Dec 17 Sat Hundred Peaks, Palos Verdes South Bay Group I: Arctic (8336'), Grays (7920'), Silver (6758'): Moderately paced, strenuous, road and cross-country. 3 hikes total - 12 miles round trip, 3000' gain. Bring 10 essentials, lunch, and water. Esasage (preferred) or sasas with recent conditioning, phone & rideshare information to Leader: KENT SCHWITKIS Co-Leaders: GEORGE WYSUP, PAMELA ROWE

Dec 18 Sun Hundred Peaks
O: LA by night Xmas Hike: Join leader STAG BROWN on his annual trek through downtown LA where we also distribute food and clothing to the homeless. Along the way visit Little Tokyo, Music Center, Bonaventure, and many other sites as we criss cross our way to the Pantry for breakfast. Meet at Union Station parking lot at midnight Saturday night. Leader: STAG BROWN Assistants: BOBCAT THOMPSON, JOE YOUNG

Dec 30 Fri Hundred Peaks, PVSB, Natural Science
I: Ryan (5457'), Bernard (5430'), Little Berdoo (5440'): Moderately paced, strenuous, cross-country and trail. 10 miles round trip, 3600' gain. Some dirt road driving. Bring 10 essentials, lunch, and water. Esasage (preferred) or sasas with recent conditioning, phone & rideshare information to Leader: KENT SCHWITKIS Co-Leader: GEORGE WYSUP Naturalist: SHERRY ROSS

Jan 1, 2006 Sun Hundred Peaks, PVSB, Natural Science
I: San Jacinto Pk (10,804'), Folly Pk (10,480'), Drury Pk (10,160'), Marion Mtn (10,320') via Snowshoe: Moderately paced, strenuous over varying terrain from the tram. We will attempt up to four peaks, resulting in 10 miles and 3600' gain. The leaders have made this San Jacinto pilgrimage for 6 years. Mt Charleston and the Channel Islands have often been visible. Take time to learn from our naturalists about the fauna and flora. Bring 10 essentials, lunch, and water. Esasage (preferred) or sasas with recent conditioning, phone & rideshare information to Leader: KENT SCHWITKIS Co-Leader: GEORGE WYSUP Naturalist: SHERRY ROSS

Jan 21, 2006 Sat Hundred Peaks
Annual Awards Banquet: At Tux. More details to come...

Rideshare Locations and Email Addresses (or telephone numbers) of Leaders

La Cañada: Angeles Crest Hwy (Hwy2). Just N of Foothill Fwy (I-210). Park on Angeles Crest Hwy only.
Mt. Baldy: Pomona First Federal Bank & Trust parking lot, NE corner, Indian Hill/Foothill Blvds; Town exit from I-210, S to Foothill, E to Indian Hill
North Orange County: Park-N-Ride, E side of Tustin Av just S of Lincoln Av, Orange
Symlar: Encinitas Av, S of Roxford St, Roxford exit from Golden St Fwy (I-5)

Current Trip Reports

Big Iron
March 30, 2005
By Edith Liu

An old Japanese Proverb says:

_He who never climbs Mt. Fuji (Big Iron?) is a fool._
_He who climbs Mt. Fuji twice (Big Iron?) is twice a fool._

Well, not so. Although it takes much energy and quadriceps to reach the summit of Iron Mountain, the hike to the summit is without any difficulties.

I remember the first time I conquered this peak in late May of 2001, when we were freezing cold and got wet to our underwear as we brushed against the dew-soaked branches. Then at about 7000′ we left the clouds below us and dried out as we hiked the last 1000 feet in warm sunshine.

March 30, 2005, my second climb to Big Iron presented quite different conditions: Mars, Martin and I were prepared for the forecasted strong wind, possible snowfall above 5500 feet. We started to hike around 9:30am; there wasn’t a cloud in the sky or any wind. The so-called G.T. trail has been judiciously cleared of Yucca spines and nasty branches. It was well defined all the way up. At lower elevation we could hear the water flowing down a creek bed. At one point we passed a waterfall. As the trail got steeper we got hotter, no breeze to cool us off. Then at around 7500 feet small patches of snow appeared and we were able to safely kick-step our way through. We carried our heavy boots and crampons for nothing! As we approached the snow-covered peak, the temperature dropped about 20 degrees; we shivered as we hurried to don our jackets. And where is the register can? Mars tried to hack at the hard snow pack, but without an ice ax, we realized we had to leave without signing in.

I want to thank Mars for leading us to one of the more challenging peaks on the HPS List.

The Big 4
April 15 – 17, 2005
By Pat Arredondo

Our trip to the Big 4 was planned several months in advance and with all the rain in the past few months, we were thrilled to see clear and sunny weather predicted for our weekend. Access to the trailhead is open, but 4WD or high clearance is recommended. Foothill Rd. was washed out by the recent storms, however there is access via detours around several barricades — even though there are a couple of signs that say the road is closed. The remaining water crossings to the trailhead were not too difficult and there was even a standard low-clearance car parked there when we arrived about 9:30 PM.

Our group of seven (Virgil Popescu, leader, co-leader Pat Arredondo, assistant, Spencer Berman, Lilly Fukui, Suzy Hermann, Lloyd Johnson, Val Saubhaya) arrived at various times on Thursday evening and camped at the trailhead. It was really cold that night and in the morning, Suzy’s thermometer registered a chilly 27 degrees! Just before 7:00 AM on Friday morning we bundled up and started our trek to Chokecherry Spring. We hiked the 9+ miles up the dirt road and arrived at the spring in time for lunch. By this time it had warmed up and the temperature was probably in the mid 70′s. We met a couple of hikers at the spring who had been out for several days and reported a huge rock slide, many fallen trees, and snow on the road to the “Pines,” but advised it wasn’t anything we couldn’t get around.

After lunch we walked a quarter mile down the road to the “new route” gully and began our climb to Samon. We made it safely up the gully, crossed the meadow, then up to the ridge, thrashing through brush, climbing over rocks, more thrashing, more rocks, and finally the summit after a couple of hours or so. Back at the spring we loaded up on water and trudged wearily up the road the 1.7 miles, 700 feet gain to Madulce Saddle where we set up our camp. By the way, one could fill a liter bottle at Chokecherry Spring in about three seconds — plenty of water flow this year.

On Saturday we started out for the “Pines” just before 7 AM. It was a beautiful sunny day, with a light gentle breeze. We were able to carefully climb over the rock fall on the road where the big slide had occurred. We continued on past Alamar Station and farther up the road we encountered quite a bit of snow and several fallen trees we had to climb over and/or under — quite an obstacle course! (This section of the road is in serious need of maintenance.)

We did Big Pine first, the high point of Santa Barbara County, after avoiding the snow as much as possible the short distance to the peak (where were my snowshoes?). As we got closer to the turnover for West Big Pine, there was a bulldozer parked on the side of the road. From that point on, the road had been graded and was in fairly decent condition. We reached West Big Pine and enjoyed the spectacular views of the Santa Barbara backcountry. Of course, our work wasn’t over for the day, and back we trudged through our obstacle course of mud, snow and broken trees. Incidentally, there were many places along the trail where one could get water. All the creeks that are usually dry were flowing. Some of us added snow to our water bottles too for a refreshingly cool drink.

We got back to our campsite at Madulce Saddle, had a snack, got more water, rested a while and then started out to tackle Madulce. (A short distance from the trailhead we met another hiker/backpacker who had just spent the night on Madulce.) It seemed like forever, but we finally completed the 23 switchbacks and got to Madulce Peak late afternoon. We were all pretty exhausted by this time and after a break, we barely made our way back our campsite. We did it! We
finished the Big 4! What a great time! Tired as we were, we were all pleased to have achieved our goal. Now all we had to do was get back to the cars the next morning! Only a little over 11 miles to go in the morning! We could do that!

The next morning we packed up and hiked down the road. There were many wild flowers, some just starting to bloom and sweeping vistas, sandstone cliffs, rolling hills now a rich green color with all the recent rains. When we were about a mile or so from the trailhead, a couple of forest service volunteers in trucks drove by. They had been doing trail work off the main Santa Barbara Canyon Road and were on their way home. When we finally arrived at the trailhead and our cars, we enjoyed soaking our sore feet in the cool stream. After our "good-byes" we started home.

I want to thank our leader Virgil Popescu and all the participants who made this trip a memorable one – Spencer Berman, Lilly Fukui, Suzy Hermann, Lloyd Johnson, Val Saubhayana. What a wonderful weekend! Listening to the news at home I found out there was an earthquake centered near Maricopa on Saturday afternoon. Was this caused by us jumping for joy after completing the Big 4?!

Lilly Fukui: Now I know why they call it the BIG 4 - ugh. The 50 mile backpacking hike was a real killer! All of us walked like a zombie after we got to our cars. Don't ever want to backpack again is how I feel! But once we reached the car (at the end of our hike), we went to the river and cooled off our swollen feet!

A short story: We left on Thurs. night and got to the trailhead where we set up our tent, at about 10 pm; got up at 5:30 to start hiking (backpacking) in about 10 miles at 6:30 a.m. It was very cold in the morning but about 8 am the sun came out and it turned out to be a warm day. After about 4 hrs. we got to the spring and backtracked a bit to go up the gully (rock climbing) to get to our first peak...it was long and continuous...and what not! We came back down after about 11 hrs. of hiking (w/ daypacks only), and then we got back to the spring, put back our backpacks to our next hiking area to set up tent. Ugh. Got up at 5:30 again on Sat. to do our 3 peaks.....we did em...in the snow, in the fallen trees, climbing over rocks, etc. Boy...I couldn't wait to get back to our tent! We had a good night's sleep before heading back out 10 miles with our backpacks. Beautiful spring flowers on the trail everywhere - purple, yellow, pink, just gorgeous.

Lloyd Johnson: I like the way the hike was planned, meaning, the order in which we hiked the peaks was great. I felt good that I made it. I really liked the way all of us helped each other during the trip.

Suzy Hermann: I learned a lot and enjoyed a lot, well, most of it anyway, but not the brush-whacking. I'd love to hike with all these folks again. They were just delightful and exceptionally helpful (even though I may never backpack again.)

Val Saubhayana: It was very nice hiking trip. I sure did enjoy it and I got four more peaks!

Spencer Berman: Backpacking into this area of the San Rafael Wilderness is always a treat and especially with the great group we had. Although this remote area has one of the higher concentrations of Black Bear in Los Padres N.F. no recent evidence of any yet. Suspect this will change within another month as more food becomes available up high. With the volume of water flowing at Chokecherry Spring and in gullies on way up to Big Pine—Did not use any supplemental water purification. Hope I'm not wrong.

Bighorn Mountains Meeks Adventure
Private hike, Thursday, Apr 7, 2005
by George Wysup

Zobeida "Pathfinder" Molina phoned Wednesday, "I just found out I don't have to work tomorrow. Are you going hiking?" I wasn't, but I never have to work, so why not? I knew she was in need of Meeks and Bighorns (HPS 23 E and A) for List #2. I quickly formulated a plan to get me explorer routes on both, with pathfinder routes for Ms. Z. M. "Meet me at 5:30 am," I instructed. She didn't whine; many would have.

Meeks

HPS is providing more opportunities for strange emblems, which serves to keep many of us neurotic.
obessive-compulsive interested. I planned for us to climb Meeks by hiking the usual road around to the northwest side, then summiting via the west ridge. I had already hiked it from the north and from the east, ergo an explorer by my definition (especially since a private property issue precludes us from hiking from the south side). From there we would drive to Bighorn Mountains route 3, rather than make the easy road hike from the Meeks road. After a gourmet breakfast at Carl’s in Yucky Valley we sped in my old 4Runner to the New Dixie Mine Road for the slow, bouncy, 10 mile drive to the Meeks trailhead. 4WD was necessary to negotiate the soft sand starting about 3 miles in. Then there were a couple of small ravines where the water flow had bored a few boulders and created some actual stream banks, also requiring 4WD and high clearance. The plains near Landers were loaded with yellow flora, mostly desert dandelions and related asteraceae. A few miles up the dirt road we were awed by a profusion of brilliant purple from Desert Canterbury Bells (Phacelia campanularia). As we got above 5000’ the bright colors mostly changed to green and brown.

We started hiking about 1/4 mile short of the ruined cabin. About the only flowers worth noting were the belly flower, Pringle’s Wooly Daisy (Erionium pringlei), and the Lotus — or Loti to you Latin speakers — L. rigidus and strigosus. The hike was short and sweet and uneventful except for an encounter with a 5 foot buzz worm that gave ample warning, even to my aged and malfunctioning ears. The peak had a perfectly good register that has not seen much traffic. The road was almost as drivable as ever.

We had enough daylight left to climb Bighorns from the desert side.

Bighorn

We drove the prescribed 12+ miles north on 247 to Bighorn road, then south 2 miles to Cholla road, then a right turn to search for the road toward Bighorn Canyon, as the peak guide directs for route 3. My memory failed me (as usual). I turned south on the first road I came to, which looked strangely familiar though route 3 was new to me. For the first 0.4 mile this road was fine, but then it began to jar our bones, so I stopped after 0.6 mile. We donned our packs and gear and set forth on this adventure. The road is so bad that even hiking on it is a chore — it is easier paralleling the road. We hiked through the common flora, Desert Chicory, White Tidy-tips, Goldfields, Desert Pincushion (Chaenactis fremontii), purple Lace-leaf Phacelia (P. distans), and violet Notch-leaved Phacelia (P. crenulata) with the caterpillar shaped flower heads. Some of the less common wildflowers in bloom were Desert Paintbrush, Sand Gilia, Forget-me-not (Cryptantha possibly pterocarya), Western Tansy-mustard, Whispering Bells (Emmenanthe pendulifloria), and Long-beaked Streptanthella (S. longirostris). Then we came to the cabin. Something was rotten, because there is another cabin exactly like it on route 2. We continued up the gully and the terrain just didn’t match the topo (where we were supposed to be), hard as I tried to force it to match. A quick check with the not-so-trusty Garmin E-Trex revealed that we were, indeed, dead on route 2. We had to salvage our pathfinder/explore somehow. We could have traversed east for a mile to join the real route 3, but we decided to go southeast, then south, up a perfectly nice ridge right next to us which joins route 3 just north of bump 5641 on Bighorn Ridge. This ridge went quite nicely with occasional mild class 2.

On the ascent Zobeida yelled, “Hey, pseudo-expert, what’s this red flower?” I told her if it is red it has to be paintbrush. It wasn’t paintbrush. I looked it up at home. It was a Scarlet Milketch (Astragalus coccineus), quite a nice bloom and not so common. A bit later Zobeida said, “Oh, oh. Let’s get out of here fast!” Then I saw what she saw, a large, dark, fast moving cloud that consisted entirely of honeybees. They passed without bothering to sting us to death. We paused to reflect on life and its fragility. If the bees had decided to sting us en masse it would have mattered not at all that we hiked together and not alone. I know nothing of the inclinations of swarming bees, especially Africanized bees. Probably they are too busy searching for a suitable new home to bother stinging anything. We were a bit uneasy at the concept. The unusual profusion of wildflowers no doubt increases the likelihood of bee swarms.

On with the hike. No problem We turned westerly along Bighorn Ridge, crossed a few dips, and ended up atop the HPS summit at 5894’. We returned via route 2 to patiently waiting cold beer, 2 more pathfinders/explores in our bags.

Naturalizing at Carrizo Plain and Caliente Mountain: A Natural Science Section / Hundred Peaks Section / Wilderness Adventures Section Trip
April 16-17, 2005
by Ginny Heringer

On Saturday, April 16, a group of about twenty hikers gathered at the Goodwin Educational Center in the Carrizo Plain National Monument ready to begin a driving tour with a BLM guide. After record winter rains, we were hoping for great wildflowers and the monument had plenty of them: driving into the park, we passed fields of fiddleneck, lupine, and owl’s clover, with meadowlarks on almost every fence post.

Our first stop was the Soda Lake Overlook, where we had a rare view of the lake with water reflecting the Temblor Range, surrounded by a rim of white soda. We learned the difference between the similar-looking coreopsis and goldfields and saw the ball-shaped flower heads of chia and a number of rare white delphiniums. Next we went to the edge of the lake and discovered the danger of sinking into the soda and the mud underneath. The guide mentioned that monument visitors occasionally walk into the Education Center with muddy legs and no shoes.

Then we drove south to an area recently visited
by a group of “plein air” artists who sell their paintings for thousands of dollars. The area was lush with poppies, lupines, and goldfields and we saw a living painting free of charge. After plenty of time to take photos, we continued on to the monument’s unique destination: Painted Rock, a horseshoe shaped sandstone outcropping that was and still is a place of special significance for Chumash Indians, one of the most important pictograph sites in the country. The stylized paintings are in three colors, red from hematite, black from wood charcoal, and white from shale or gypsum, and represent cultural and religious beliefs that are not yet understood.

At this time of the year, Painted Rock is closed to the public because of bird nesting activity, except for this guided tour once a week. To avoid disturbing the birds, we walked silently while the guide pointed out the features of interest. You can imagine our surprise when a large barn owl suddenly came out of a hole in the rock, circled the small area a couple of times just over our heads, and flew out of the rock enclosure! Then another shock – a rattlesnake warned us to stay away, one of three rattlesnakes we saw in the area. When we walked around the outside of the rock, we were relieved to see the barn owl fly back into the rock enclosure and hopefully back to its nest. Along the way we spotted more flowers – red maids, a red-purple vetch, and locoweed. When the tour ended, some of us went to see the San Andreas Fault at Wallace Creek, while others returned to the California Valley Motel for showers and dinner, and others set up camp at Selby Campground.

We met again on Sunday morning for the second highlight of the weekend, a 17-mile round-trip hike along the Caliente Ridge to the peak. It was a long hike, but we took time to look at the repeated pattern of synclines and anticlines pointed out by our geologist Ron Zappen and at more flowers - baby blue-eyes, cream cups, yellow salsify, Dudley’s clarkia, and best of all, chocolate lilies. We were also excited by several sightings of horned lizards and scallop-like bivalve fossils embedded in several rocks jutting from the ridgeline. We reached the peak, topped with the remains of a wooden structure used in World War II by observers watching for Japanese planes. We had a leisurely summit lunch and congratulated our leader George Wysup for his sixth completion of the Hundred Peaks list - that’s actually about 1650 peaks! The real celebration took place after we walked the 8 ½ miles back to our cars when we toasted George’s accomplishment and a wonderful weekend of camaraderie with cold bubbly drinks and lots of hugs. As we drove out the south end of the park, we were delighted with one last sight the monument has to offer: three pronghorn antelopes close to the road.

A list finish, another peak for those of us who are counting, and four completions of the natural science requirement for the “I” rating, plus all those fabulous flowers – a great weekend for all. Thanks to my co-leaders, Tom Hill, George Wysup, Sherry Ross, Marlen Mertz, and Ron Zappen!

The BEEG Four
May 29 & 30, 2005
by George Wysup

I need these monsters (Samon, Madulce, Big Pine, and West Big Pine) for list #7 and managed to find several other people, who either had no clue or who had forgotten the previous experience, to join me on this. Many of them decided to go a day earlier. It is wise to spread this 50 miler with almost 10,000’ gain over as many days as possible. I am not wise.

After sleeping at the trailhead Saturday night, John Connelly, Roxana Lewis, Sonia Arancibia, and I headed up the road by good moonlight at 4:40 am. Yes, that’s right, 4:40. We arrived at Chokecherry Spring at about 9 am to meet some hikers who had climbed the Big Pines on the previous day. They were: Wayne Voltaire, Edd Ruskowitz, Melissa Kane, Diana and Jorge Estrada, and Don Cwik.

The spring was running free, plenty of water pouring into the trough and also down the dirt slope. Liter bottles fill in 3 seconds. There should be ample water even in October this year. I did not filter mine (I’m lazy, and I trust my bad judgment) and, 5 days later, I have no evidence of illness.

Some were nursing blisters from the day before. They had added some extra miles after turning right at the 4.5-mile road junction, an error that they eventually corrected. Then, Zobeida Molina and Tom Connery, who had left the trailhead at 6 am with day packs, caught us just as we were all preparing to bag Samon.

The weather was cool enough, but the air was still. 12 of us headed up that gully to Samon at about 9:30. The gully is beginning to get a bit dangerous because of all the loose rock, and traversing out of the gully to the ridge requires vegetable belays or really good lug soles to avoid plummeting back down. The route is notably more brushy that it was last year, as you might assume after all the rain, but is basically the same as ever, and better than it was about 4 years ago. Without performing surgery on the brush, Samon will soon be back to nature and impenetrable to all but the hardiest bush whiskers.

The first casualty was Jorge Estrada, who was feeling very poorly, likely the effects of the previous day’s effort, so he waited at the meadow. Then there were 11. An easy pace with few routefinding errors got us to the summit before 12:30, with the first timers wondering why anyone would ever do this more than once. Edd measured the route on his GPS, coming up with 2.1 miles for the one-way distance. Edd began to feel quite queasy, so everyone fed him gatorade, GU, Ener-C, and whatever other miracle foods to the point that he felt really queasy. This slowed our return, so we reached the spring something after 3:30. Zobeida and Tom headed back down the hill, having gotten the one peak that they wanted or needed.

At this point 8 of the hikers were up for Madulce— Diana, a recovered Jorge, Don, and Wayne in addition to my foursome. We promptly headed up the
road leaving Edd and Melissa to stay in their camp at the spring. At about 7 pm they were awakened, yes that's right, awakened at 7 pm, by 2 bikers who turned out to be Kathy Cheevers and Mars Bonfire returning from another conquest of Big Pine and its westerly cousin.

The 3-day group had told of being awakened the previous night by a large rockslide nearby. We could see it on our way up the road. An unwary camper could have turned into vulture food. Lesson: watch where you pitch your camp at Chokecherry spring. We four hauled our backpacks and a backbreaking load of extra water up to Madulce Saddle so we could camp there. The advantage of this is that we would not have to hike this extra 3.4 miles with 700’ of gain twice.

We departed for Madulce a bit after 5 pm, anticipating a post-dark return. This is a good way to turn a pretty and enjoyable hike into a hurry up trudge. The trail up to the junction is as good as ever, but there are many more fallen trees across the upper trail now, making the trek a bit slower. We reached the summit in under 2 hours and spent less time up there than the peak deserves.

On the return we stayed in a group to the trail junction, at which point I figured my group responsibility ended since everyone had lamps. I removed about half a pound of pink plastic tape from the route (why can't people who need to leave this litter remove it on their return?). I reached our camp at the saddle at about 8:45 without needing my headlamp. Others, quite a distance back, turned theirs on. We bade them all a fond adieu as they headed back to rockslide heaven for the night.

Sonia, the only one of us with a tent, struggled some to erect it in the dark. A cold "dinner", and we hit the hay after a day of some 22 miles with perhaps 7000’ elevation gain, much of it with loaded backpacks.

Roxana, true to her usual style, wanted us all to get up at 4 am to start hiking early, presumably so we could get back early to the crime and pollution from which we had just escaped. I got up at 5:30 (for the usual reason), and figured further sleep would help little. My legs were quite out of fuel, but nothing was going to fix that problem quickly. Suck it up and hike, Wysup!

We headed off for Big Pine at 6:22 am, Roxana said. My eyes were too bleary to read my watch face, so I trusted her. Initial (a week earlier) intelligence from Markey and Robert Neighbors was that the road from Alamore was littered with downed trees. We were pleased to hear from Wayne and Co. that the road had been fixed and the trees were gone. So the hike to Big Pine was pretty much the same as always. I had intended to take the shortcut from the summit of Big Pine, heading southwest through the brush down to the road (which I had done a few times with good results, but I changed my mind after seeing that most of the trees had their tops blown off, and I didn’t want to spend the rest of the day crawling under logs. The other group had taken that shortcut, or something resembling it, the day before and they pronounced it "extremely brushy". So we descended the way we ascended, more or less along the old road.

No big savings from that shortcut anyway.

On the way to West BP we encountered a friendly fellow with mountain bike loaded with panniers fore and aft. He had come up via Oso campground past Little Pine Mountain. He was a Santa Barbara local who, to his credit, had negligible interest in HPS. Signing in on West BP, John noticed that Mars and Kathy (yet another mountain bike adventure) had signed in on the day before. They probably cruised by while we were battling Samon and Madulce; anyway we didn’t see them. There are a few newly downed trees on the trail to West Big Pine, but they didn’t impede our progress.

We got back to Madulce Saddle at about 12:30. I had been feeling really tired and sore and was even slower than usual. John Con suggested I pop a few vitamin I pills (ibuprofen, in case you haven’t heard). This worked amazingly well, making the rest of the hike out almost comfortable. We reached the cars (and my cold beer) at about 6 pm.

We hit the Memorial day homeward bound traffic on I-5 at about the town of Cardiac (sp?) and drove the next 15 miles or so at speeds between 0 and 20. I’ve got to move out of this rotten, congested, polluted area! But I won’t. Question of the week: Why is it that so many otherwise intelligent native English speakers insist on calling Madulce “Mal Dusay”?

Delightful Spring Flowers With Snow in Kern County

Sunday, April 10, 2005
By Lilly Y. Fukui

This enjoyable hike to Skinner Peak was led by none other than the ever vigorous Virgil Popescu, on a warm Sunday morning in April. The happy group of six included Virgil, Lilly Fukui, Val Saubhayan, Ginny and Jim Heringer, and Dave Cannon (who just did his "I" provisional the day before, on Black Mountain #4).

We started our two-hour drive from Sylmar and at SR14 and SC 65 we headed out on a dirt road for approximately 14 miles to the trailhead at Bird Spring Pass.* We passed a lot of cows (some fat, some skinny), and saw lots of blooming goldfields (yellow flowers).

We started our hike up the PCT and the names of the yellow, blue, and purple flowers, along with plants (Mormon tea), and trees (Pinyon, Joshua), were provided to us by Ginny while we hiked and saw a variety of them. We also encountered lots of soft snow near the top and a few of us were snacking on same. We got to the peak in less than two hours, just in time to enjoy our lunch. The view from the peak was spectacular - clear blue sky and puffs of altocumulus undulatus clouds!!

With a full stomach we cheerfully headed down. By a suggestion from Jim, we all took a nice shortcut to the lower portion of the trail. This was fun. Before we knew it we were surrounded by the beautiful yellow flowers again and sure enough back to our vehicles for a chat and homemade banana bread for all! It was a very nice day, except for the below incident.

*It is important to mention here to all ladies (and guys): DO NOT leave your valuables in your car/truck/Jeep/ SUVs at any time!!! A theft (Val's purse and Virgil's coins) occurred from Virgil's vehicle sometime during the four hours that we were gone hiking! We did see a young man sitting in his SUV when we got to Bird Spring Pass but he soon got out and started hiking. He did have a backpack on him. There were also quite a few bikers nearby. Still, we just can't figure out who might have done this! There was no sign that Virgil's vehicle was broken into. There is good news, however: A Kern County Sheriff has caught the thief who had a lot of credit cards on him (which didn't belong to him, of course), one of them being Val's!!!
Upcoming First Aid and Leadership Seminars
By Lynda Armbruster

July 16 - Free Chapter-sponsored First Aid class in Los Angeles; advance registration required, limited capacity so sign up early. Send 2 SASE + $50 check (refunded at class) made out to FACF, phone and email contacts to 1st Aid/CPR, 514B Garfield Ave., South Pasadena, CA 91030. See LTC website for more information (http://angeles.sierraclub.org/ltc/)

Sept 17 - Free Chapter-sponsored First Aid class registration required, limited capacity so sign up class made out to FACF, phone and email contacts to 1st Aid/CPR, 514B Garfield Ave., South Pasadena, CA 91030. See LTC website (http://angeles.sierraclub.org/ltc/)

Nov 5 - Free Chapter-sponsored First Aid class in Los Angeles; advance registration required, limited capacity so sign up early. Send 2 SASE + $50 check (refunded at class) made out to FACF, phone and email contacts to 1st Aid/CPR, 514B Garfield Ave., South Pasadena, CA 91030. See LTC website for more information (http://angeles.sierraclub.org/ltc/)

Nov 12 - Free Chapter-sponsored First Aid class in Orange County; advance registration required, limited capacity so sign up early. Send 2 SASE + $50 check (refunded at class) made out to FACF, name, address, phone and email contacts to 1st Aid/CPR, 514B Garfield Ave., South Pasadena, CA 91030. See LTC website for more information (http://angeles.sierraclub.org/ltc/)

October 1 - Leadership Training Seminar in Griffith Park; required for all potential leaders. Send $25 check made out to "Sierra Club," name, address, phone and email contacts to Steve Botan, LTC Registrar, 18815 Thornwood Circle, Huntington Beach, CA 92646 by mid-September

October 29 - Angeles Chapter Outings Assembly meeting, 9am to 1pm (all leaders welcome; location - TBD)

REGISTER BOX
By Jim Adler

There were numerous register reports from Damon Guizot, Gail Hanna, Kent Schwitikis, and Karen Issaacson Leverich but together they resulted in only one change, the removal of one deficient register from the list.

Gail Hanna has asked me to pass on the suggestion that in painting new register cans if the insides are also painted it would help prevent rust.

Missing and deficient registers:

If you are climbing any of the above peaks, please consider bringing a new register can and book. If you discover a peak which needs a new register can, please let me know by mail addressed to Jim Adler, 836 S. Alandale Ave., Los Angeles, CA 90036-4625, or telephone at (323) 931-6844 or e-mail at jimadler@mindspring.com, or from the HPS web site. Also, please advise if you have replaced any of the missing or deficient registers or discover that any of the above reports are erroneous or out of date. (Since register books and pencils are so easy to carry all the time, peaks where only books or pencils are needed are not listed.)
